CSR Highlights of 2024

This year, we proudly continued our commitment to community service and environmental sustainability through a variety of impactful CSR initiatives;

Environmental Programs

Beach Cleaning Program (August 5) and Environment Day Celebration (June 4) promoted marine and coastal conservation.

Poya Day Plant Distribution (75 Anoda plants were distributed on December 14) and Awareness Program for School Students involved eco-education and tree planting.

Sustainability Tour & Bamboo Day Celebration (September 27) welcomed university students to learn about green practices on-site.

Celebrate the achievements of students at Malewana Ayurvedic Medical College through a certificate and award ceremony. (May 11)

Awareness program for school students, On December 30, we held a special program for Dhamma school students, where 50 Anoda plants were distributed among students and teachers to promote environmental awareness and sustainability.

Book distributions and financial aid were offered to school children and scholarship achievers.

Religious & Cultural Support

Multiple Almsgiving Ceremonies and Buddha Pujas were conducted across the year including on Vesak and Poson Poya. (Sangika Dana Pinkama – November 14, Gilanpasa Buddha Pooja Ceremony – September 13...)

Almsgiving Program was held at Sri Dalada Maligawa – Kandy (June 4), contribution to local Dansels and the Ama Dahara Bodu Gee Concert (June 22).

Health & Welfare

Organized a Free Ear Clinic for staff (January 8) and On December 20, we held a successful Blood Donation Program where 15 Anoda plants were distributed among the medical crew as a token of appreciation.

Donated essential supplies (Bath towels, Face towels, Dustbins, etc....) to the Sri Lanka Cancer Society (August 5).

Education & Youth Empowerment

The Annual Donation to Malewana Ayurvedic College continued, supporting educational costs and student welfare (Since January 2010).

Student Induction Ceremony was held at Malewana Sri Gnanissara Ayurvedic Medical College to welcome and induct new students (December 11)

Community Engagement & Celebrations

Celebrated the Sinhala Hindu New Year Festival and supported local events through financial contributions, including the Regional Literary and Arts Festival (November 19) and Pubudu Youth Club's activities.

These initiatives reflect our dedication to sustainable development, cultural preservation, and community well-being. We thank all staff and partners who contributed to making 2024 a year of meaningful impact.

Achievements & Recognition 2024

Presidential Environment Silver Award

We are proud to be honored with the Silver Award at the Presidential Environment Awards for our outstanding environmental initiatives, conservation efforts, and long-standing dedication to protecting Sri Lanka's natural heritage.

Travelife Gold Certification

Certified for excellence in sustainable tourism practices, the Travelife Gold Certification recognizes our long-term commitment to minimize the environmental impact, improving the economic & social impacts for people in our community, respecting & protecting human rights & fair labour practices and safeguarding animal welfare & biodiversity

5S Certification

This certification reflects our dedication to workplace efficiency, organization, and continuous improvement through the internationally recognized 5S methodology.

Iso 14001 Certification

Receiving the ISO 14001 Environmental Management Certification showcases our strong environmental policies, practices, and our efforts to reduce our ecological footprint through systematic, sustainable management.

Our Green Projects

At Barbelyn, sustainability is not just a practice—it's part of who we are. From nurturing traditional methods to pioneering new eco-friendly solutions, our ongoing projects highlight our commitment to a greener, more self-sufficient future.

Coconut treacle making

We've embraced the art of traditional coconut treacle production chemical-free, locally sourced, and sustainably crafted. This not only supports local artisans but preserves age-old techniques passed down through generations.

Rooftop garden

Our rooftop garden brings nature to new heights! Grown with care, it supplies fresh herbs and vegetables to our kitchens while reducing building heat and enhancing biodiversity. It's a living example of how urban spaces can thrive sustainably.

Yam project

With a deep respect for native crops, our yam cultivation project strengthens food resilience and promotes biodiversity. These hardy, nutritious roots are grown organically and celebrated as a sustainable food source.

Bee honey production

Bees are the heartbeat of biodiversity. Our eco-friendly beekeeping initiative not only yields pure, medicinal-grade honey but also supports local flora through natural pollination, creating harmony between health and habitat.

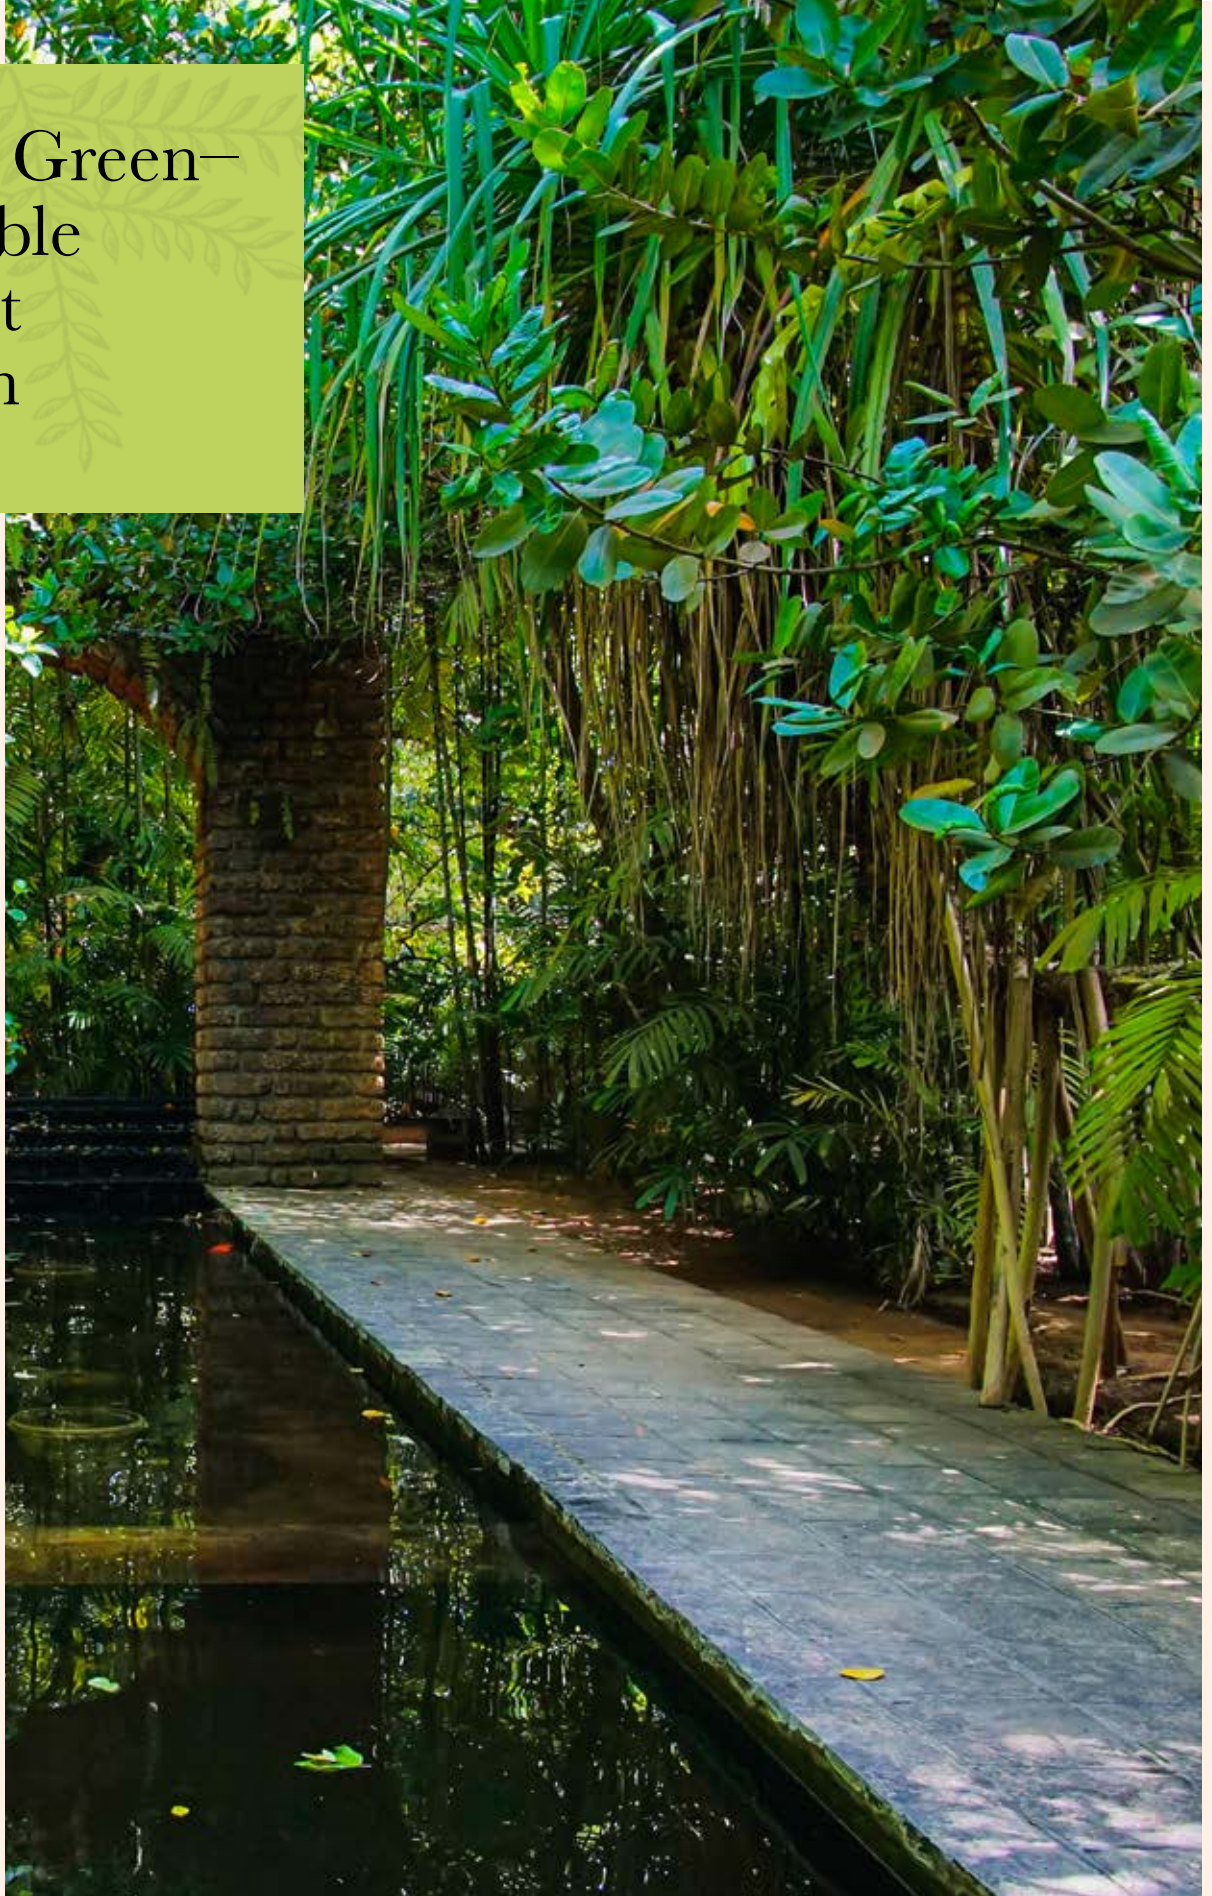

Beach cleaning programs

Our regular beach clean-ups bring the community together to protect marine life and coastal beauty. These programs serve as reminders that every small act of care can create big waves of change for our oceans.

Building Green— Sustainable Design at Barberyn

At Barberyn, sustainability is built into our very foundations—literally. Our resort's design reflects a deep respect for the environment, incorporating green building principles that conserve resources, reduce our carbon footprint, and enhance guest well-being. Here are some of the highlights:

Waste Management Practices

Our comprehensive waste management program includes upcycling, composting, and reducing single-use plastics. We strive to minimize waste and promote a cleaner environment.

Rainwater Harvesting

Our rainwater collection systems reduce water waste and support landscape irrigation, especially during dry months.

Eco – Friendly Materials

We prioritize the use of local, sustainable, and non-toxic construction materials, preserving cultural identity while minimizing environmental impact.

Natural Ventilation & Lighting

Our buildings are designed to harness cross-ventilation and maximize natural daylight, reducing the need for artificial cooling and lighting.

Solar Energy Integration

Where possible, solar panels are used to supplement energy needs, reducing reliance on fossil fuels.

Energy-Efficient Lighting

We use energy-efficient LED lighting across the resort, which reduces energy consumption and provides a comfortable ambiance for our guests.
